TRAINING COURSES
JANUARY 2021

THE OVERNIGHT
DATA SCIENTIST
ZERO-2-READY
***FREE**

OVERVIEW | Dr. Bhawani Selvaretnam
Director of Data and Analytics @ Valiantlytix

21 JANUARY 2021 9:00AM - 1:00PM

The Overnight Data Scientist: Zero-2-Ready Course will set you on your path. We will demystify the jargons, explain the data science pipeline and show you how to quickly get started on your journey. We will highlight the technology landscape and share the technical and soft skills required to work with Data. A demo on how to produce your very own data dashboard in a quick and e fficient way, even if you have no data background. We will end the session with a discussion of frequently asked questions and respond to your very own queries.

OVERVIEW | Clarissa Wong
Software Developer @ Valiantlytix

26 JANUARY 2021 9:00AM - 5:00PM

Lately, PWA has been receiving more traction as companies begin to adopt this new web technology. Google has not failed to mention that while PWA carries the best flavors of native apps, it is easily accessible with any browser, on any device of your calling!

This course aims to help you get started on building your own PWA, with these must-have features and seeing how you can utilize PWAs to boost your user engagement to making it live!

**PROGRESSIVE

OVERVIEW | Mohan Raj
Data Analyst @ Valiantlytix

28 JANUARY 2021 9:00AM - 5:00PM

Data Scientists are faced with the challenge of navigating the data science pipeline in their day-to-day activities. Each phase presents unique challenges which can be time consuming. Python particularly is known to be complex in its own right, given that it is a general-purpose language that is heavily utilized in Data Science. However, there are several Python libraries that can help optimize day-to-day Data Science activity. In this course, participants will be guided to unleash the power of Python through tips and tricks that can enable efficient execution of the Data Science Pipeline.
