Venue: https://meet.google.com/hui-kcic-sza

Majoring: TE
(Students of other majors, postgraduate students and staff are welcomed to join)

TALK ABSTRACT

The talk will cover the current status of mobile communication in Malaysia especially towards 5G deployment and to explain the role of MCMC especially towards mobile operation in Malaysia including spectrum licensing and spectrum assignment.

ABOUT MCMC:

VISION: Establishing a communications and multimedia industry that is competitive, efficient and increasingly self-regulating, generating growth to meet the economic and social needs of Malaysia.

MISSION: We are committed to :
Promoting access to communications and multimedia services;
Ensuring consumers enjoy choice and a satisfactory level of services at affordable prices;
Providing transparent regulatory processes to facilitate fair competition and efficiency in the industry;
Ensuring best use of spectrum and number resources; and
Consulting regularly with consumers and service providers and facilitating industry collaboration.
