Innovate Malaysia 2021
Design Competition

Take up a challenge by the industry as your Final Year Project!

Get supports in

industry tools

real-life problems

training & mentoring

Open to bachelor's degree students in E&E, mechatronics, software engineering, computer science, IT, science/mathematics, etc.

Design Challenges

Teams may choose one of the Design Challenges below as competition project, creating solutions to tackle the problem posted.

CREST

Smart city, digital healthcare, & precision farming
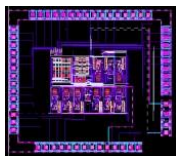

DHL Express

Smart logistics

Sarawak Energy

Smart energy systems

Technology Tracks

Teams may choose one of the technology tracks as the platform to implement the competition project.

SilTerra/CEDEC/Intel Track

SilTerra IC design/ fabrication process

Intel Track

Embedded system design with Intel processor or Intel FPGA

Keysight Track

Electronic design and test solutions for Automotive, IoT and Energy devices and applications

Microsoft Track

Microsoft Azure applications

AWS Track

Cloud services and applications
